

Get a better Handle on your Material Handling Problems.

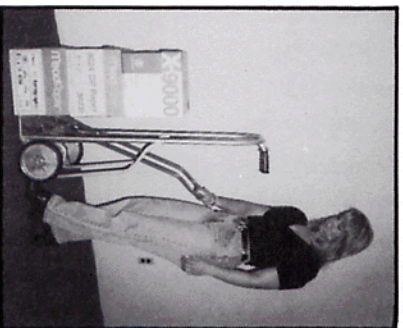

Olé Roller is a revolutionary new device available on a heavy-duty Dutro Hand Truck which safely and quickly separates the Hand Truck from its load.

Olé Roller transfers a rearward pull of the handle into a highly leveraged outward pull which literally slides the Hand Truck from beneath its load. No jerking, struggling, or physical strain is required.

Pull the Handle and Walk Away!

Pull the Handle

and

Walk Away

- ✦ Sturdy steel construction
- ✦ Saves time and increases productivity
- ✦ Space saving unloading against walls, under desks or **anywhere**
- ✦ Minimizes material damage due to toppled boxes
- ✦ Reduction of time loss accidents
- ✦ Minimizes back and knee injuries related to unloading
- ✦ No heavy physical strain
- ✦ No pushing, wiggling, or bending
- ✦ Employers will realize fewer accidents and increased productivity. Workmen compensation claims, material damage, and lost time will all decrease.
- ✦ Unloads 300 lbs... **Pull the Handle and walk away!**
